The San Diego State University Literacy Center offers low cost diagnostic and tutoring services to the San Diego Community. We have improved the reading skills of hundreds of children and adults. We believe that the community’s future will be affected in part by the quality of the education provided to children. Toward that end, the Literacy Center provides superb teacher training to our Reading Specialist and our Master’s in Reading Education candidates as well as expert instruction for Reading Recovery Teacher Leaders. We welcome members of the community to visit our facility and learn about our services.
