OFFERED FOR THE FIRST TIME IN SUMMER
SPED 530 ISSUES IN AUTISM
with PROFESSORS BETH PAVEZ BCBA & DAN BACON

ABOUT SPED 530: Issues in Autism provides an overview of autism including current understanding about the cause, prevalence, and identification of evidence-based practices. Students will increase their knowledge about the strategies used by educators and parents that have been demonstrated as effective to address social and communication skills. The course focuses on the characteristic of individuals with autism across the spectrum and across the age range from first diagnosis in early childhood through services and support in adulthood.

COURSE OFFERED SUMMER 2017
